

Name of the Equipment / Facility	120 KW CONTRA-ROTATING EDDY-CURRENT DYNAMOMETER SETUP
Purpose of Use	Used for load testing of Contra-Rotating Propulsion Motors
Photograph	
Key Specifications	<p>Type : PC based DC contra rotating motor test rig consisting of tandem eddy current dynamometer</p> <p>Load Capacity : Up to 120 KW per shaft</p> <p>Power Output : 120 kW at 3000 RPM per shaft</p> <p>Rated Torque : 19 kg.m. to 50 kg.m at 3000 RPM per shaft</p> <p>Speed Range : 500 to 3000 RPM for each shaft</p>
