Registration ends on 03 Jan 2025

About the Seminar

Seminar on Autonomous Air Vehicles - Technologies and Applications is an annual event jointly conducted by Aeronautical Development Establishment, (DRDO) and Design Division of Aeronautical Society of India, Bangalore for UAV community to share their knowledge and expertise. This annual event focuses on technology developments & end applications related to UAVs for both civil and military domains. Like previous years, this time also the event will be conducted in hybrid mode with in-person and online participation.

Area of Focus

- **Next Generation UAVs for Air Dominance**
- **Autonomy Through AI Technologies**
- **Advanced Design & Manufacturing Technologies**
- **Synergy Between Industry, Academia and R&D**
- **Disruptive/Transformative Technologies**

Disruptive Idea Competition

A student competition is also being planned during the seminar. Refer the below webpage for more details.
