

All Terrain and Combat Boots

All Terrain and Combat Boot developed by Defence Institute of Physiology and Allied Sciences (DIPAS) is a Light Weight boot, constructed on ergonomic principles with improved functional features for different terrain and shock absorption ability. It improves balance and stability during walking uphill and in real terrain conditions either with or without load. It reduces transfer of impact force to the lower extremities and minimizes risk of falls and overuse injuries. Reduction in energy expenditure delays onset of fatigue and enhances walking efficiency and mobility.

Interested industries are requested to **submit documents as per the list in Appendix-A** along with their **Financial Bid in sealed envelope mentioning name of technology on top of the envelope**, through one of the following agencies only before the bid ending date:-
