

FLAME RETARDANT AIRCREW SURVIVAL JACKET

The Aircrew Survival Jacket (ASJ) is intended to house the Pilot location beacon (PLB) assembly including V/UHF whip antenna and GPS. Airworthiness obtained from RCMA (AC).

Salient features:

- The PLB along with accessories helps to identify the geographical location of the pilot who has ejected out of the aircraft.
- Made out of combination of flame-retardant material woven and knitted fabric
- Withstand wind blast pressure of 600 KEAS
- Various versions developed for KIRAN, MIG, Mirage & Jaguar series
