

Flame Retardant Gloves

Flame Retardant (FR) Gloves is five finger design gloves for aircrew made out of inherently FR fabric and leather with touch sensitivity suitable for operation in Indian tropical climate.

Salient features:

- Touch sensitive for seamless interface with touch screens of MFD (cockpit)
- Flame retardant in order to provide protection to the hands in case of any unforeseen fire incident
- Available in 7 sizes to cater for maximum fighter aircrew population
- Extended gauntlet is provided for additional protection
- Designed to provide stretchable wide mouth for easy don and doff

Materials:

- Manufactured out of FR knitted fabric (preferably meta-aramid) and touch sensitive leather
- Leather (thin & flexible) provided on the palmar side
- Knitted fabric (flexible & stretchable) used on the dorsal side
- FR sewing thread (preferably aramid) used for stitching
- Colour: Sage green
