

Figures of Merit (FoM)

*The **Figures of Merit (FoM)** section in the project proposal form is designed to capture key performance indicators for the proposed technology. It includes fields for defining critical properties, their targeted values, international benchmarks, and the measurement methodologies to be employed. This structured approach allows for a clear comparison of the project's goals with global standards, ensuring accountability and precision. Additional rows can be added as needed to comprehensively document all relevant parameters.*

(Add more rows at the end)

Property	Parameter	Targeted Value	International value	Measurement Methodology
