

Surveillance Remotely Operated Vehicle (SROV)

Surveillance ROV (SROV) is a remotely operated vehicle equipped for multi-role capability for Indian Army and other security agencies involved in counter terrorist application. The Surveillance Remotely Operated Vehicle (SROV) has been designed to be one man portable on his backpack and be deployed using a hand held operator console. The SROV can traverse through urban and cross country terrain. It is capable of climbing stairs and entering into buildings. It is equipped with cameras with day and night vision capability. The SROV can be remotely controlled and provides live video of the area under surveillance. The on-board cameras are switchable and allows for all round view. SROV has backpack based Master Control Station (MCS) which enable remote control operation of the ROV using easy to use interface and controls. The MCS consists of Rugged Controller with high resolution display, touch screen and user friendly interface.

In addition, the SROV can be used as a platform to carry a Water Jet Disrupter (WJD) to defuse Improvised Explosive Devices remotely. The WJD is mounted on a pan-tilt platform and the operator can use the two laser pointers provided to aim at the target. In addition, the SROV can also be used for remote charge dropping using a specially designed mechanism.
