

Advanced Engineering Test Station-Mk2 Industrial Grade (AETS-Mk2-IGS)

Advanced Engineering Test Station-Mk2 Industrial Grade (AETS-Mk2-IGS) is a real time test system capable of carrying out various tests on the Digital Flight Control Computer (DFCC) of LCA class aircraft including Hardware Acceptance Testing of the DFCC LRU, Hardware Software Integration and Testing (HSIT), Hardware In Loop Simulation (HILS) as part of Iron Bird platform and Squadron I-Level Tester for fault identification of DFCC LRU. Since DFCC houses the servo electronics control and is directly interfaced to Electro Hydraulic actuators, AETS-Mk2-IGS system provides hardware interfaces in exact similitude. DFCC has the capability to interface with inertial sensors like Acceleration Sensor Assembly (ASA) and Rate Sensor Assembly (RSA). It uses cPCI modules for primary computation and digital interfaces with dedicated ARM9 boards (each interfaced with customized signal conditioning cards) running concurrently for ensuring real time updates of Analog and Discrete interfaces.

Figure 1 AETS-Mk2-IGS

Capabilities of AETS-Mk2-IGS

- To simulate interfaces of all interfacing LRUs with the Digital Flight Control Computer
- To monitor the outputs of DFCC as well as the simulations of AETS-Mk2-IGS
- To introduce failures like cross channel mistrack, wire-cut, actuator stuck valve etc
- To carry out real time test script execution thereby enabling H/W ATP, Hardware Software Integration & Testing (HSIT) and Pre-Installation (PI) Checks
- To support progressive integration of real interfaces (Actuators, Sensors, Cockpit etc) with DFCC thereby enabling Sub System Integration (SSI), System Integration (SI), HILS in Iron Bird Configuration, Pilot in Loop (PIL) Test and Fault Free Test

Min Facility/ Capability criteria for Industry Partner

- Quality management certification like AS9100/ISO 9001/CMMI level 3 at the time of submission and should have experienced manpower in procedures as per IMTAR-21 for obtaining CEMILAC & DGAGA certification.

- Should have experienced manpower, infrastructure & tools to carry out schematic capture, PCB design, manufacturing of complex multilayer PCBs, aerospace industry standard cable looms design, mechanical design, system configuration & integration, project management, inventory management, quality assurance.
