

All Terrain and Combat Boots

“All Terrain and Combat Boots” developed by Defence Institute of Physiology and Allied Sciences (DIPAS) is a light weight boot, constructed on ergonomic principles with improved functional features for different terrains and shock absorption ability. It improves balance and stability during walking uphill and in real terrain conditions either with or without load. It reduces transfer of impact force to the lower extremities and minimizes risk of falls and overuse injuries. Reduction in energy expenditure delays onset of fatigue and enhances walking efficiency and mobility.
