

900ms Delay cum Pyro Cartridges (DCPC)

HEMRL has developed several pyro cartridges to meet the requirement of missile programme. 900ms DCPC is one of the delay pyro cartridges developed for carrying out ignition of auxiliary motors. The development is complete in all the aspects and comprehensive technology is ready for transfer for production.

The schematic of 900ms DCPC delay pyro cartridge is as follows.

900 ms DCPC

900ms DCPC delay pyro cartridge has electrical initiator, delay composition and pyrotechnic compositions. On provision of electrical impulse, 900ms DCPC provides suitable energy in quick time essentially required for ignition of henceforth elements. 900ms DCPC has been designed considering the requirement of redundancy as well as high reliability. The required raw materials for hardware fabrication as well as chemicals for preparation of pyrotechnic compositions are indigenized and available for taking up production by Govt./Pvt. agencies. Thus, the technology for manufacturing of 900ms DCPC delay pyro cartridge is matured and ready for transferring as per the Govt. norms to suitable Govt./Pvt. agencies exhibiting explosive handling license.
