High performance epoxy-rubber and rubber based adhesives have been developed for joining rubber to rubber and rubber to metal articles.

**SALIENT FEATURES**

- **System**: Epoxy-rubber (two component) and Rubber based (one component)
- **Pot life**: 8 hour
- **Application**: By brush
- **Curing time**: 72 hour for epoxy-rubber and 24 hour for rubber based adhesive
- **Peel strength**: 12 kN/m for epoxy-rubber and 2 kN/m for rubber based adhesive

**AREAS OF APPLICATION**

- For adhering rubber sheet to metallic structures, e.g. pipe insulation
- For joining of rubber to rubber sheets, e.g. multilayer mats

**STATUS**

Technology available for transfer
